Introduction to JMIS Monthly Data Report

This report provides a summary of juvenile detention admissions for July 2022, Length of Stay for calendar year 2022, Admissions by Age for calendar year 2022 and summaries on Presenting Offense.

Data Source

Juvenile detention data derived from the Juvenile Monitoring Information System (JMIS). JMIS is a web-based data platform, which gathers and disseminates data on the detention of youth in all juvenile detention facilities in Illinois. JMIS is a collaborative data system funded by the Illinois Juvenile Justice Commission with support from the Illinois Department of Human Services. The Center for Prevention Research and Development, in the School of Social Work at the University of Illinois, Urbana-Champaign maintains JMIS.

The Administrative Office of the Illinois Courts requires counties to report data on every admission of a youth to detention. Each detention center utilizes its own data collection system to process, track and monitor youth in their facility. Each detention center is responsible for getting their data into the JMIS system, either by uploading or hand entry, to populate JMIS with de-identified data for state and local analysis and planning. It is the responsibility of the detention centers to ensure that their data are accurate and complete in JMIS.

*JMIS is a dynamic database constantly updated by the sixteen juvenile detention centers in Illinois. Therefore, the data submission frequency of any given detention center may affect the data contained within this report. **The data for this report was pulled from the JMIS database on December 12, 2022.** When detention centers experience technical difficulties with either uploading or manually entering data into JMIS, a notation has been added to the resulting summaries that have been affected.*
